Project: **West Dowling**

Neighborhood Impact

Comment No. **7183** We are also concerned about losing parking space at our building. If the pedestrian and bike paths are too close we will be backing into them and/or the street.

Comment No. **7247** What news, if any, is there regarding the acquisition of the properties on my south property lines?

Noise

Comment No. **7246** I am still interested in the possibility of installing sound barriers between my property & the new DOT ROW. Something along the lines of what was installed along C Street just north of Dimond BLVD.

We are currently on well for water, and would like to know how we could get hooked up to city water during construction.

Hello Jim, I spoke with you back in July re: the Dowling Rd Project. I own Lots 10 & 11 Hanson Acres Subdivision 5911 & 5901 Denali. We discussed my concerns for the drainage coming down Cordova & Denali streets that eventually flows down the NW property line of lot 11 and in extreme weather events will flow in the driveway and down the property line between lots 10 & 11 & some how ends up in the drainage ditch along the north edge of Dowling Road. Thus far I have received no notice of any public meeting being scheduled. However, I see on your website a meeting was scheduled for 11/8/08. Did this meeting occur? If I did miss it will any other meetings be scheduled ?

Safety Issue

Finally, currently the trail crossing for the Campbell Creek trail is poorly marked. With backed up traffic (until your trail upgrades are completed)...it will be very difficult for bike commuters to get across this road. Please make safety provisions for this crossing and keep this corridor open!

Traffic Circulation

My comment is that you please just see that the traffic is not affected too heavily along the Potter/Dowling interchange during business and heavy traffic hours (to me this means 6a-7p Mon-Fri). It would be a hardship to have to traverse around by going all the way south to Dimond, or north to International Airport Road for regular commuters in the area.

Secondly, I would also pay especially close attention to traffic trying to get off Austin Street to take a left on Dowling. When traffic is backed up, this very important neighborhood artery is very hard to use. I'd also say the same for people trying to turn onto Austin from the West-bound lane of Dowling. I can explain this further for you if needed. Just visit the area around 5:00 and you will see exactly what I am referring to.
